NETWORK INFRASTRUCTURE

Leaders in Communication Technology

NSI has been manufacturing professionally preferred products, award-winning brands and end-to-end solutions since 1975. Our focus on future-forward technology, dependable service, competitive pricing and quick delivery times ensures NSI will help you tackle the toughest projects with ease.

LEADING BRANDS

Connect with Confidence.

ENET delivers ultra-reliable, compatibility guaranteed transceivers and network connectivity solutions with factory direct pricing.

Trusted Since 1964.

LYNN specializes in cabling, connectivity and cable management solutions designed to meet the demands of modern network, broadband, audio visual and security infrastructures.

Cut. Strip. Terminate. Test.

Platinum Tools specializes in professional-grade tools, testers, and installation accessories used for the preparation, termination and integration of low-voltage cabling.

Simplify Fiber Optics.

TechLogix delivers innovative, value-rich solutions while simplifying the design and integration of fiber optics in AV, security, broadband and datacom applications.

Professional Quality Tape.

Whether you are bundling, insulating, splicing or simply need protection against corrosion, UV or moisture, WarriorWrap® outperforms the competition even in the harshest environments.

WHY PARTNER WITH NSI?

Save Time & Money

Innovative solutions delivering easy installation and competitive pricing

Fast Delivery

98% of in-stock products ship within 24 hours

Custom Products

Custom engineer, bundle and brand products for your unique needs

Project Kitting

All NSI products ship together for convenience and efficiency

Dedicated to USA

Proudly headquartered in the USA with regional engineering and manufacturing

ENET: CONNECT WITH CONFIDENCE

CONNECT WITH CONFIDENCE

Based in California, ENET is a leading supplier of Tier-1 network connectivity solutions that power today's Enterprise, Hyperscale, AI and Broadband markets. Programming and testing onsite in the United States, ENET offers a full range of OEM compatible transceivers, direct attach copper cables, active optical cables and cabling products at significant savings over OEM originals.

WHY PARTNER WITH ENET?

Reliability

99.9% reliability guaranteed for dependable performance

Compatibility

Rigorous OEM validation testing for seamless integration

Cost Savings

Up to 75% less expensive than OEM equivalents

USA-Based

Engineered, programmed and warehoused in the USA

Lifetime Warranty

Backed by an industry-leading lifetime warranty

OPTICAL TRANSCEIVERS

POPULAR OPTICAL TRANSCEIVER FORM-FACTORS

800G (OSFP, QSFP-DD)

- Multiple wavelengths & cable types
- Transmission lengths up to 10km
- MPO / MTP connectors
- OEM compatible programming
- Lifetime warranty

400G (OSFP, QSFP-DD, QSFP112)

- Multiple wavelengths & cable types
- Transmission lengths up to 80km
- MPO / MTP & LC connectors
- OEM compatible programming
- Lifetime warranty

200G (QSFP56, CFP2, QSFP-DD)

- Multiple wavelengths & cable types
- Transmission lengths up to 80km
- MPO / MTP & LC connectors
- OEM compatible programming
- Lifetime warranty

100G (QSFP28, CFP2, CFP)

- Multiple wavelengths & cable types
- Transmission lengths up to 100km
- MPO / MTP & LC connectors
- OEM compatible programming
- Lifetime warranty

40G (QSFP+)

- Multiple wavelengths & cable types
- Transmission lengths up to 80km
- MPO / MTP & LC connectors
- OEM compatible programming
- Lifetime warranty

25G (SFP28)

- Multiple wavelengths & cable types
- Transmission lengths up to 80km
- LC connectors
- OEM compatible programming
- Lifetime warranty

10G (SFP+, XFP)

- Multiple wavelengths & cable types
- Transmission lengths up to 100km
- LC & RJ45 connectors
- OEM compatible programming
- Lifetime warranty

2.5G (SFP)

- Multiple wavelengths & cable types
- Transmission lengths up to 15km
- LC & RJ45 connectors
- OEM compatible programming
- Lifetime warranty

1G (SFP)

- Multiple wavelengths & cable types
- Transmission lengths up to 160km
- SC, LC & RJ45 connectors
- OEM compatible programming
- Lifetime warranty

COMPATIBILITY, COMPLIANCY & PERFORMANCE

All ENET transceivers are MSA (Multi-Source Agreement) compliant for form, fit and function in all MSA compliant networking platforms. Additionally, all products meet IEEE Standards for optimal performance and reliability, and each module is uniquely programmed, tested, serialized and serviced in the United States to ensure compatibility, functionality and traceability in its intended application.

View the entire list of ENET transceivers and options online at ENETUSA.com.

DIRECT ATTACH COPPER & ACTIVE OPTICAL CABLES

POPULAR DIRECT ATTACH COPPER CABLE (DAC) FORM-FACTORS

Direct Connection

- Designed for switch-to-switch connections
- SFP, SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 1G – 800G data rates
- 24 & 30 AWG twin axial construction
- 0.5 – 10m lengths
- OEM compatible programming
- Lifetime warranty

Breakout

- Designed for switch-to-multiple-switch connections
- SFP, SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 1G – 800G data rates
- 24 & 30 AWG twin axial construction
- 0.5 – 10m lengths
- OEM compatible programming
- Lifetime warranty

Multi-Vendor Conversion

- Designed to connect switches from different OEM manufacturers
- SFP, SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 1G – 800G data rates
- 24 & 30 AWG twin axial construction
- 0.5 – 10m lengths
- OEM compatible programming
- Lifetime warranty

POPULAR ACTIVE OPTICAL CABLE (AOC) FORM-FACTORS

Direct Connection

- Designed for switch-to-switch connections
- SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 10G – 800G data rates
- Fiber optic construction
- 1 – 100m lengths
- OEM compatible programming
- Lifetime warranty

Breakout

- Designed for switch-to-multiple-switch connections
- SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 10G – 800G data rates
- Fiber optic construction
- 1 – 100m lengths
- OEM compatible programming
- Lifetime warranty

Multi-Vendor Conversion

- Designed to connect switches from different OEM manufacturers
- SFP+, QSFP, QSFP28, QSFP56, QSFP-DD, OSFP & QSFP112 constructions
- 10G – 800G data rates
- Fiber optic construction
- 1 – 100m lengths
- OEM compatible programming
- Lifetime warranty

LEVERAGING DACS AND AOCs

ENET direct attach copper cables (DACs) and active optical cables (AOCs) play a crucial role in modern hyperscale datacenters by providing reliable, high-speed connectivity that meets the stringent performance and reliability requirements of today's applications, virtualization technologies and cloud services. Unlike transceivers which require a separate patch cord or trunk, DACs and AOCs are complete factory plug-and-play assemblies in lengths up to 100m (330 feet).

View the entire list of ENET options online at [ENETUSA.com](https://www.ENETUSA.com).

HIGH-BANDWIDTH HYPERSCALE

YOUR HYPERSCALE PARTNER

With rapid advancements in hyperscale computing technology and the 800G AI/HPC datacenter, today's network operators are challenged to keep up with the immense demand for high bandwidth and low latency performance. Additionally, scalability and upgradability are crucial to accommodate increasing devices and data volumes, and reliability and redundancy are paramount to ensure continuous operation and minimize downtime. Finally, interoperability is needed for seamless integration of diverse components. ENET is here to help address these challenges through ongoing innovation and investment in cutting-edge networking technologies.

ENET is consistently innovating optical transceiver solutions to anticipate industry trends and advancements in technology. NSI continues to invest in cutting-edge equipment, research and development, ensuring our solutions remain at the forefront of technological advancement. ENET delivers the latest technology, including OEM-compatible 800G InfiniBand and Ethernet transceiver solutions for NVIDIA/Mellanox, Arista and other OEM platforms, and we're already investing in the 1.6T solutions on the horizon. With solutions for every major networking OEM from 1G through 800G, our cutting-edge R&D team continuously keeps you ahead of the trend.

Choose ENET for a partnership built on trust, innovation and proven expertise, empowering your business to thrive and scale in today's competitive landscape.

POWERING THE TECHNOLOGY OF TODAY AND TOMORROW

High-bandwidth transceivers, direct attach copper cables and active optical cables are essential components in today's advanced network applications across a vast array of industries, application and vertical markets. Virtually every network relies on fast, reliable, low-latency connections, both internally and externally. ENET delivers the cutting-edge technology needed for exceptional performance today and seamless expansion tomorrow.

COMMITMENT TO COMPATIBILITY

US-BASED ENGINEERING, PROGRAMMING, VALIDATION & SUPPORT

Unlike most connectivity suppliers who simply import transceivers and rely on untested third-party programming, ENET operates an established California-based laboratory where code is compiled and tested for compatibility and interoperability with the specific OEM networking equipment for which it's intended. This hands-on approach ensures all ENET transceivers, direct-attach copper cables, and active optical cables operate seamlessly and reliably in over 100 OEM switches, servers, and other networking equipment.

Code engineering based on actual OEM switches & servers

Transceiver, DAC cable & AOC cable programming

Performance validation with actual OEM switches & servers

Order fulfillment & logistics

Post-sales support & product updates

USB & AUDIO-VISUAL CABLES

USB 2.0 (Hi-Speed)

- Available with white or black jackets
- Male A, Female A, Male B, Male C & Micro-B USB connection options
- Lengths up to 50 feet
- Lifetime warranty

USB 3.0 (SuperSpeed)

- Available with black jackets
- Male A, Female A & Male B USB connection options
- Lengths up to 50 feet
- Lifetime warranty

USB 3.1 (SuperSpeed)

- Available with black jackets
- Male A & Male C USB connection options
- USB to HDMI, DisplayPort & VGA conversion cables
- Lengths up to 50 feet
- Lifetime warranty

Lightning to USB (SuperSpeed)

- Available with white or black jackets
- Male A USB to Male Lightning connectors
- Lengths up to 6 feet
- Lifetime warranty

Mini-DisplayPort

- Available with white or black jackets
- Mini-DisplayPort to Mini-DisplayPort cables
- Mini-DisplayPort to HDMI, DVI, VGA & standard DisplayPort conversion cables
- Lengths up to 15 feet
- Lifetime warranty

DisplayPort

- Available with white or black jackets
- DisplayPort to DisplayPort cables
- DisplayPort to HDMI, DVI, VGA & mini-DisplayPort conversion cables
- Lengths up to 50 feet
- Lifetime warranty

DVI

- Available with black jackets
- Analog & digital constructions
- DVI to DVI cables
- DVI to VGA, DisplayPort & HDMI conversion cables
- Lengths up to 82 feet
- Lifetime warranty

HDMI

- Available with black jackets
- HDMI to HDMI cables
- Active long-distance cables
- HDMI to DVI, DisplayPort & mini-HDMI conversion cables
- Lengths up to 25 feet
- Lifetime warranty

VGA

- Available with black jackets
- Available in video only or with 3.5mm stereo audio connections
- Available with compact micro profile connectors
- Lengths up to 100 feet
- Lifetime warranty

MORE OPTIONS FROM NSI

Can't find what you're looking for? Visit the LYNN section for additional patch cords, power cables, enclosures and cable management solutions, and the TechLogix Network section for fiber-based HDMI, USB and DisplayPort cables and networking electronics.

TRUSTED SINCE 64

LYNN has been servicing the communications industry since 1964 and specializes in solutions designed to meet the demands of modern network, broadband, audio-visual and security infrastructures. Whether you need custom fiber and twisted pair trunks, patch cords, power cables, enclosures, keystones or outdoor connectivity hardware, LYNN is guaranteed to offer a high-quality solution.

WHY PARTNER WITH LYNN?

Elite Corning® Gold™
Products manufactured and tested to guarantee performance and longevity

Fast Delivery
East and West coast manufacturing for fast production and delivery

Nationwide Support
More than 100 locally based sales and technical support representatives

USA-Based
Dedicated to elite US-made and TAA compliant product

Dedicated to Innovation
Setting new standards with unique, problem-solving patented products

WHAT'S NEW

Felt Tape

- Felt strips with adhesive backing
- Designed to be a buffer under cable ties and cable entry points
- Ultra-thin and pliable
- Available in 12 unique colors

TheNID with Reel Fiber Enclosure

- Enclosure preloaded with 50 – 150ft of simplex single mode fiber on rotating reel
- Cable features extra rigidity for easy pushing and pulling
- Snap-on SC/APC connector

L-LOCK Dual-Locking Power Cables

- Dual-locking power cords with C13 to C14 connectors
- Connector easily locks and unlocks with a finger press
- Available in 2 – 10ft lengths

HyperDrop PAS Mini Enclosure

- Ideal for splicing, repairing and extending cables in outdoor environments
- IP68 rated for direct burial and aerial
- Compatible with fiber, twisted pair, coaxial and other low-voltage cables

HyperDropGEL Fiber Enclosure

- Ideal for splicing, repairing, extending and repairing fiber in outdoor environments
- IP68 rated for direct burial and aerial
- Unique waterproof gel-based sealing system

Cable Managers

- Rack mount cable managers for routing and securing low-voltage cables
- 1U and 2U sizes
- Single-sided and double-sided designs
- Extra-wide and extra-deep cable fingers

CUSTOM FIBER OPTIC CABLES & TRUNKS

WHY PARTNER WITH LYNN FOR CUSTOM CABLES?

LYNN is one of the largest custom cable assembly manufacturers in the United States with facilities on the East and West coasts. We specialize in quick-turn fiber and copper cable assemblies and are a premier member of the Corning® CAH ConnectionsSM Gold Program, ensuring product is manufactured, tested and independently audited to the highest standards.

WHY PURCHASE CUSTOM PRE-TERMINATED CABLES?

Pre-terminated cables provide a plug-and-play solution for connections between switches, servers, patch panels and other network and AV equipment. They deliver guaranteed quality and performance, reduce onsite installation labor, reduce warehouse and operational costs, and provide you access to premium products and components.

CUSTOMIZED & OPTIMIZED FOR YOUR INSTALLATION

Made-to-Order Based on Your Requirements

Simplex, Duplex & Multi-Strand Counts

Premium Connectors with Custom Stagger Length & Breakout

Indoor & Indoor/Outdoor Constructions

Optional Armoring for Protection & Durability

Corning Bend-Insensitive Fiber

Optional Spooling & Pull-Eye for Easy Deployment

100% Tested Including Report & Labeling

Serialization for Traceability

Optional Slim Trunks for 8, 12 & 24 Strand Count Cables

PREMADE FIBER OPTIC CABLES & PATCH CORDS

POPULAR PATCH CORDS & PREMADES

Standard Patch Cords

- Affordable, high-quality cables
- Available in multimode & single mode
- Available with a variety of connectors
- Stocked lengths for quick shipment
- Available in custom lengths, constructions & strand counts

Corning® Gold Patch Cords

- Cables guaranteed to deliver optimum performance
- Available in multimode & single mode
- Available with a variety of connectors, including uniboot LC
- Built on-demand in custom lengths & configurations

Bright Patch Cords

- Self-powered LEDs let you illuminate connectors for easy tracing
- Available in multimode & single mode
- Duplex uniboot LC connectors
- Stocked lengths for quick shipment

MTP (MPO type) Patch Cords

- Ideal for high-speed connections (100G+)
- Premium MTP (MPO type) connectors
- ClearCurve® bend-insensitive fiber
- 100% tested including report
- Stock lengths for quick shipment
- Available in custom lengths & constructions

Universal LC Elite™ Patch Cords

- Toolless reverse polarity
- Mini LC-ready with simple trigger change for high-density installations
- Available in multimode & single mode
- Duplex LC connectors with push-pull trigger
- Stock lengths for quick shipment
- Available in custom lengths & constructions

Flat Drop Cable

- UV & water-resistant outdoor jacket
- Available in toneable & non-toneable configurations
- Available in Optitap to blunt & Optitap to SC APC configurations
- Stock lengths for quick shipment
- Available in custom lengths & constructions

Ruggedized Patch Cords

- UV & water-resistant jacket
- Thickened jacket for added protection and stapling
- Stock lengths for quick shipment
- Available in custom lengths & constructions

Micro-Armored Patch Cords

- UV & water-resistant jacket
- Internal steel micro-armor for added protection from abrasion, cutting & rodents
- Stock lengths for quick shipment
- Available in custom lengths & constructions

Pushable / Pullable Bullet Fiber

- UV & water-resistant jacket
- Added rigidity to eliminate kinks when pushing & pulling through holes & duct
- Internal steel micro-armor for added protection
- Stock lengths for quick shipment
- Available in custom lengths & constructions

IN-HOUSE ENGINEERING & PROJECT KITTING.

NSI employs dedicated customer experience and solutions architects to ensure your design addresses current and future technology trends. Whether your next installation requires LYNN patch cables, custom assemblies, patch panels or other connectivity solutions, the NSI team will help with engineering and ensure everything ships kitted and ready for deployment.

TWISTED PAIR CABLES & PATCH CORDS

LYNN offers three series of copper patch cords designed for your specific application. ProFIT is designed for the most demanding environments, Optilink+ balances price and performance, and CHOICE delivers a quality cable at a competitive price. All three are available in standard jacket or 28AWG slim constructions.

PROFIT

ProFIT™ delivers superior quality and performance from a cable that's 100% manufactured and tested in the United States. Count on ProFIT for your most demanding installations.

ProFIT Slim
CAT6 & CAT6A (28AWG)

- Quick turn customized solution
- Made in USA & 100% Fluke tested
- Serialized for traceability
- Premium cable & connector with low-profile snagless boot
- 55% smaller diameter

ProFIT
CAT6 & CAT6A

- Quick turn customized solution
- Made in USA & 100% Fluke tested
- Serialized for traceability
- Premium cable & connector with low-profile snagless boot

OPTILINK+

Optilink+® balances price and performance from a cable that's 100% manufactured in the United States.

Optilink+ Slim
CAT6 & CAT6A (28AWG)

- Quick turn customized solution
- Made in USA
- Low-profile snagless boot
- 55% smaller diameter

Optilink+
CAT5E, CAT6 & CAT6A

- Quick turn customized solution
- Made in USA
- Low-profile snagless boot

CHOICE

CHOICE delivers a quality cable at a competitive price. CHOICE cables are aggressively stocked for quick shipment.

Standard Jacket

28AWG Slim Jacket

LYNN offers three series of copper patch cords depending on your application. ProFIT is designed for the most demanding environments, Optilink+ balances price and performance, and CHOICE delivers a quality cable at a competitive price. All three are available in standard jacket or 28AWG slim constructions.

STANDARD POWER CABLES

LYNN stocks thousands of color-coded power cables in a variety of lengths and configurations, allowing you to easily and affordably segregate power runs and electronics.

LYNN power cables are manufactured in precise lengths with an ultra-flexible construction, ensuring a smooth installation and increased airflow in your racks and cabinets.

POPULAR CONSTRUCTIONS

C14 to C13

- Standard & locking constructions
- 17 stock lengths
- 8 stock colors
- 18AWG & 14AWG

DUAL-LOCKING POWER CABLES

UNIVERSAL DUAL-LOCKING POWER CABLES

The patented LYNN L-LOCK Series is the easiest-to-install, most advanced dual-locking power cable available. It eliminates accidental disconnects by securely locking both cable ends to electronics and power equipment, regardless of make and manufacturer.

The L-LOCK latch system locks and unlocks with a simple finger press that's perfect for high-density installations – *no clunky clips, brackets or additional hardware required*. L-LOCK cables are an easy replacement for existing non-locking or single-locking power cables.

Patented latch system easily locks & unlocks with a finger press

Available in multiple connector configurations, colors & lengths

Ensure equipment uptime by securely locking into equipment ports

Universally compatible with electronics & power equipment

L-LOCK PRODUCT LINES

C14 to C13

- L-LOCK dual-locking system
- Available in black, blue & red
- Standard lengths: 2ft, 3ft, 4ft, 5ft, 6ft, 8ft & 10ft
- 18AWG/10A

C20 to C19

- L-LOCK dual-locking system
- Available in black, blue & red
- Standard lengths: 2ft, 3ft, 4ft, 5ft, 6ft, 8ft & 10ft
- 12AWG/20A

*Protected by US Patent No.: 11,476,620. Additional patents pending.

SINGLE-LOCKING POWER CABLES

P-LOCK

SINGLE-LOCKING POWER CABLES

The LYNN P-LOCK Series features “P-shaped” clips on each side of the plug housing that lock into compatible PDU ports with an audible click.

P-LOCK cables are designed specifically for Raritan®, ServerTech® & Vertiv™ lockable PDUs, though they will connect to other makes and models of product with varying levels of tension.

P-LOCK PRODUCT LINES

C14 to C13

- P-LOCK clip system on male power connector
- Available in 8 standard colors
- Available in 12 standard lengths
- Available in 18AWG/10A & 14AWG/15A

C14 to C15/C13

- P-LOCK clip system on male power connector
- Available in 8 standard colors
- Available in 11 standard lengths
- Available in 14AWG/15A

C14 to C19

- P-LOCK clip system on male power connector
- Available in 8 standard colors
- Available in 10 standard lengths
- Available in 14AWG/15A & 12AWG/20A

C20 to C13

- P-LOCK clip system on male power connector
- Available in 7 standard colors
- Available in 10 standard lengths
- Available in 14AWG/15A

LOCKING SLEEVES

LYNN SureFIT™ locking sleeves provide added protection for the female power connector on P-LOCK cables and both power connectors on standard power cables. SureFIT™ sleeves install over the connector housing, creating a strong connection that prevents power cables from accidental disconnections.

SureFIT™ locking sleeves are available in multiple colors and C20, C19, C15, C14 and C13 formats.

SUREFIT
LOCKING SLEEVE

OTHER POWER SOLUTIONS

C14 to NEMA 5-15R Plug Adapter

P/N: PWR-C14-515R

- Single IEC320 C14 connection to single NEMA 5-15R connections
- Converts a NEMA 5-15R three prong receptacle (standard US outlet) to a C14 connection
- Ideal for converting a standard US AC power cable into a C13 slot on a PDU

C20 to Dual C13 Plug Adapter

P/N: PWR-ADP-C20C13x2

- Single IEC320 C20 connection to dual IEC320 C13 connections
- Allows two C14 power cables to connect to a single C19 PDU port
- Saves space on UPSs, surge protectors & power strips

C14 to Dual C13 Power Cable Splitter

P/N: PWR-3X24JL-52BK-01.2F

- Single IEC320 C14 connection to dual IEC320 C13 connections
- Allows two devices to share a single power receptacle

12 port Rack-Mount Power Hub

P/N: TL-RKPS-01

- Provides power to 12 DC-powered devices
- Each output channel is selectable between 5, 12 & 24VDC
- Redundant power supplies ensure uninterrupted operation
- 100ms sequencing per channel on startup
- Remote channel on/off control via RS232, Ethernet or built-in webserver
- Front panel control & keylock

WHY COLOR-CODE POWER CABLES?

Color coding makes identifying and managing prime and redundant power sources easier, resulting in fewer accidental shutoffs and less downtime. It's especially important with mission-critical electronics and in high-density installations. Data cables are typically color coded, but power cables are often overlooked.

NID FIBER OPTIC ENCLOSURES

NID INDOOR/OUTDOOR ENCLOSURES

The NID™ compact outdoor-rated enclosures are perfect for managing fiber optic connections in harsh environments. They are available in multiple configurations and are compatible with both round and flat drop cables.

Multiple models for various applications

Integrated copper ground lug

Slack storage for coiling up to 50 feet of fiber

Entry clamp accommodates both flat & round cable

Rubber grommets support up to 1" conduit

Optional model with ONT storage & cable management

Optional model with reel of factory pre-spooled fiber

Custom laser Engraving available

CORE™ FIBER OPTIC ENCLOSURES

CORE™ INDOOR ENCLOSURES

CORE™ fiber optic enclosures feature a patented internal removable frame that provides easy setup and maintenance. Simply mount the outer chassis, wire the inner frame and then snap the two together.

Removable inner frame for easy wiring & maintenance

Compatible with standard LGX panel inserts

Dual hinged enclosure for easy access to front & rear connections

Non-captive cable entry ports for easy setup & updates

Dual locks on front & rear for added security

Built-in bubble level for fast professional mounting

Port labeling for quick identification of cable paths & connections

Stackable half-moon cable managers (available with model FPP-14-W-25-V2)

SLIMFIT™ FIBER OPTIC ENCLOSURES & WALLPLATES

SLIMFIT™ INDOOR ENCLOSURES & WALLPLATES

SlimFIT™ enclosures simplify fiber connectivity and cable management. They provide a compact, easy-to-install enclosure that blends into most residential and commercial environments.

SlimFIT™ Compact

The Compact Connection Point provides a low-profile fiber management solution for tight spaces. It easily mounts to surfaces with double-sided tape or screws.

SlimFIT™ Customer

The Customer Connection Point provides an ultra-slim fiber management solution for single gang wallboxes, low-voltage trim plates and walls.

SlimFIT™ MDU

The MDU Connection Point combines fiber management with easy cable deployment. The enclosure features a built-in fiber reel pre-loaded with 100ft (30m) of simplex 600µm single mode fiber terminated with SC/APC connectors.

SlimFIT™ Plate

The Plate Connection Point combines fiber and copper keystone management into a single enclosure. It mounts directly to single gang wallboxes, low-voltage trim plates and walls.

SlimFIT™ Duo

The Duo Connection Point provides fiber management for two SC or four LC connections. It easily mounts to surfaces with screws.

SlimFIT™ ONT

The ONT Connection Point provides a convenient, secure mounting and cable management solution for modems* and their connected fiber.

LGX WALL MOUNT & RACK MOUNT FIBER OPTIC ENCLOSURES

LGX WALL MOUNT & RACK MOUNT ENCLOSURES

LYNN offers multiple LGX-compatible wall mount enclosures, rack mount enclosures and adapter panel inserts for managing fiber connections. All enclosures are manufactured with 16-gauge steel for durability and lifelong performance.

LGX WALL MOUNT ENCLOSURES

1 Panel LGX Enclosure

P/N: FPP-01-W-10

Key Features

- Easy open magnetic latches
- Non-captive top & bottom entries
- Rear SC/LC/MTP coupler cutout

1 Panel LGX Enclosure

P/N: FPP-01-W-A4

Key Features

- Easy open magnetic latches
- Front cable & connection protection
- Non-captive top & bottom entries
- Rear SC/LC/MTP coupler cutout

2 Panel LGX Enclosure

P/N: FPP-02-W-18

Key Features

- Easy open magnetic latches
- Front cable & connection protection
- Non-captive top & bottom entries
- Rear SC/LC/MTP coupler cutout

4 Panel LGX Enclosure

P/N: FPP-04-W-19

Key Features

- Easy open magnetic latches
- Front cable & connection protection
- Non-captive top & bottom entries
- Rear SC/LC/MTP coupler cutout

LGX WALL MOUNT & RACK MOUNT FIBER OPTIC ENCLOSURES

LGX RACK MOUNT ENCLOSURES

1U LGX Bulkhead Patch Panel

P/N: FPP-03-R1-24

Key Features

- 3 LGX panel support
- Fits any standard 19" rack
- Low-cost open frame design

1U CHOICE LGX Enclosure

P/N: FPP-03-R1-23

Key Features

- 3 LGX panel support
- Easy release latches
- Non-captive cable entries & mounting ears

1U Standard LGX Enclosure

P/N: FRMP-1U-V2

Key Features

- 3 LGX panel support
- Easy open magnetic latches
- Front cable & connection protection
- Non-captive cable entries & mounting ears

1U Premium LGX Enclosure

P/N: FPP-03-R1-03

Key Features

- 3 LGX panel support
- Easy open magnetic latches
- Tinted front cover & E-Z slide tray
- Removable top & front faceplate
- Non-captive cable entries & mounting ears

2U Premium LGX Enclosure

P/N: FPP-06-R2-04

Key Features

- 6 LGX panel support
- Easy open magnetic latches
- Tinted front cover & E-Z slide tray
- Removable top & front faceplate
- Non-captive cable entries & mounting ears

3U Premium LGX Enclosure

P/N: FPP-09-R3-05

Key Features

- 9 LGX panel support
- Easy open magnetic latches
- Tinted front cover & E-Z slide tray
- Removable top & front faceplate
- Non-captive cable entries & mounting ears

4U Premium LGX Enclosure

P/N: FPP-12-R4-06

Key Features

- 12 LGX panel support
- Easy open magnetic latches
- Tinted front cover & E-Z slide tray
- Removable top & front faceplate
- Non-captive cable entries & mounting ears

8U Premium LGX Enclosure

P/N: FPP-24-R8-07

Key Features

- 24 LGX panel support
- Easy open magnetic latches
- Tinted front cover & E-Z slide tray
- Removable top & front faceplate
- Non-captive cable entries & mounting ears

LGX FIBER OPTIC PANEL INSERTS

LGX PANEL INSERTS

LYNN offers a variety of LGX adapter panel inserts for use in wall mount enclosures and rack mount panels, including options for both single mode and multimode fiber.

Clear port numbering on both the front & rear of the plate

Adapters attached securely with screws for added durability

Optional built-in shutters ensure clean ports & connections

Zirconium Ceramic or Phosphorous Bronze premium adapter construction

Available with keystone blanks for twisted pair integration

PROTECT FIBER INSTALLATIONS WITH FELT SPLICING TAPE

LYNN buffer tube felt tape protects fiber splices from slipping and abrasion, ensuring solid installations for years to come. LYNN tape is ultra-thin, ultra-pliable and features adhesive backing for fast and easy installation.

Additionally, LYNN tape is available in twelve different colors allowing you to easily identify and segregate cable paths. It's an ideal buffer under zip ties and enclosure entry points.

BULKHEAD PATCH PANELS

FACTORY-POPULATED BULKHEAD PATCH PANELS

Factory-populated bulkhead patch panels save installation time and cost. Bulkheads are manufactured with premium one-piece couplers rated for over 500 mating cycles and fit in a standard 19” rack space.

HDA HIGH-DENSITY FIBER OPTIC ENCLOSURES

HDA HIGH-DENSITY RACK MOUNT ENCLOSURES

The LYNN HDA Series is designed for high density installations where performance and durability are essential. Their space-saving layout provides a 33% increase in connector density compared to a standard LGX panel inserts.

HDA patch panels and enclosures mount in standard 19" rack frames and are compatible with Panduit® Opticom® panel inserts.

High-density panel layout provides 33% more connections

Large openings provide easier wiring & port access

Non-captive mounting ears provide easier rack installation

EZ-Slide tray provides smooth opening and closing and locks in open position

Easy open magnetic door allows quick panel access even in crowded racks

IN-HOUSE ENGINEERING & PROJECT KITTING.

NSI employs dedicated customer experience and solutions architects to ensure your design addresses current and future technology trends. Whether your next installation requires LYNN patch cables, custom assemblies, patch panels or other connectivity solutions, the NSI team will help with engineering and ensure everything ships kitted and ready for deployment.

HDA HIGH-DENSITY FIBER OPTIC PANEL INSERTS

HDA PANEL INSERTS

LYNN HDA panel inserts are constructed from 16AWG steel and are rated for over 500 mating cycles. All panel inserts feature clear port numbering on both the front and rear of the plate, and built-in LC shutters ensure clean connections every time. LYNN HDA panel inserts are compatible with Panduit® Opticom® enclosures.

HDA MTP to LC CASSETTES

LYNN HDA MTP to LC cassettes feature premium MTP (MPO-type) to LC connectors wired for method B patch cables and trunks. The cassettes are constructed from 16AWG steel with clear port numbering on both the front and rear panels. Options include built-in LC shutters to ensure clean connections every time, and all connectors are rated for over 500 mating cycles. LYNN HDA cassettes are compatible with Panduit® Opticom® enclosures.

ADD CUSTOM CABLES TO ANY PROJECT

LYNN is one of the largest custom cable assembly manufacturers in the United States with facilities on the East and West coasts. LYNN specializes in quick turn fiber and copper cable assemblies and are a premier member of the Corning® CAH ConnectionsSM Gold Program, ensuring product is manufactured, tested and independently audited to the highest standards.

OPTIMUS EXTREME-DENSITY FIBER OPTIC ENCLOSURES

OPTIMUS EXTREME-DENSITY RACK MOUNT ENCLOSURES

The LYNN Optimus Series provides extremely high fiber density in an ultra-compact frame. Optimus enclosures leverage premium MTP connectors and shuttered LC connectors with clear port numbering. Removable top panels and front faceplates provide cable access, while side and rear cable entries ensure flexible installation. Optimus enclosures mount in standard 19" rack frames.

Available in flat or angled construction

Factory customizable for different applications & connection requirements

Easy-to-read port identification on front & rear panels

Ultra-compact MDC-LC ports on OptimusMAX 288 models

Optional 6" deep rear cable lacing shelf for OptimusMAX models

KEYSTONE JACK PATCH PANELS

1U Unloaded 24-port Jack Panel

P/N: PRO-CPP-BLANK-1U-24

Key Features

- 1U tall & 19" wide
- 24 unloaded keystone ports
- Built-in rear cable management
- Matching front & rear port labeling
- Keystone jacks mount flush in ports
- Flat panel style

1U Unloaded 48-port Jack Panel

P/N: PRO-CPP-BLANK-1U-48

Key Features

- 1U tall & 19" wide
- 48 unloaded keystone ports
- Built-in rear cable management
- Matching front & rear port labeling
- Keystone jacks mount flush in ports
- Flat panel style

1U Unloaded 48-port Angled Jack Panel

P/N: PRO-CPP-BLANK-1U-48V

Key Features

- 1U tall & 19" wide
- 48 unloaded keystone ports
- Built-in rear cable management
- Matching front & rear port labeling
- Keystone jacks mount flush in ports
- Angled panel style

2U Unloaded 48-port Jack Panel

P/N: PRO-CPP-BLANK-2U-48

Key Features

- 2U tall & 19" wide
- 48 unloaded keystone ports
- Built-in rear cable management
- Matching front & rear port labeling
- Keystone jacks mount flush in ports
- Flat panel style

1U 24-port Panel with CAT5E Keystone

P/N: PRO-CPP-24-CAT5E-19

Key Features

- 1U tall & 19" wide
- 24-ports pre-loaded with unshielded CAT5E keystone
- RJ45 to 110-punchdown style keystone
- Built-in rear cable management
- Matching front & rear port labeling
- Flat panel style

1U 24-port Panel with CAT6 Keystone

P/N: PRO-CPP-24-CAT6-19

Key Features

- 1U tall & 19" wide
- 24-ports pre-loaded with unshielded CAT6 keystone
- RJ45 to 110-punchdown style keystone
- Built-in rear cable management
- Matching front & rear port labeling
- Flat panel style

2U 48-port Panel with CAT5E Keystone

P/N: PRO-CPP-48-CAT5E-19

Key Features

- 2U tall & 19" wide
- 48-ports pre-loaded with unshielded CAT5E keystone
- RJ45 to 110-punchdown style keystone
- Built-in rear cable management
- Matching front & rear port labeling
- Flat panel style

2U 48-port Panel with CAT6 Keystone

P/N: PRO-CPP-48-CAT6-19

Key Features

- 2U tall & 19" wide
- 48-ports pre-loaded with unshielded CAT6 keystone
- RJ45 to 110-punchdown style keystone
- Built-in rear cable management
- Matching front & rear port labeling
- Flat panel style

NEW PRODUCT: DUCTED CABLE MANAGERS

LYNN ducted cable managers route, secure and protect low-voltage cables in an easy-to-install footprint. Their ABS plastic construction reduces overall weight and cost without compromising product strength, and extra-wide and extra-deep cable fingers accommodate cable bundles of varying sizes.

RACK MOUNT BRACKETS & CABLE MANAGEMENT

WALL MOUNT VERTICAL RACK BRACKETS

LYNN vertical rack brackets securely manage rack panels, electronics and other 19" rack mount devices in a 90-degree position. Their space saving design mounts flush against the wall and their reinforced design supports up to 135 lbs. of load capacity.

PART NUMBER	DESCRIPTION	RACK SPACES	DIMENSIONS (INCHES)	CONSTRUCTION	LOAD RATING
MB2	2U VERTICAL WALL MOUNT RACK BRACKET	2	3.5 H x 19.0 W x 4.2 D	BLACK STEEL	135 LBS

MB6	6U VERTICAL WALL MOUNT RACK BRACKET	6	10.5 H x 19.0 W x 11.2 D	BLACK STEEL	135 LBS

WALL MOUNT HINGED RACK BRACKETS

LYNN hinged rack brackets securely manage rack panels, electronics and other 19" rack mount devices while providing swing-out access to rear panels and connections. Their space saving design mounts flush against the wall and an oversized rear opening accommodates through-the-wall cabling.

PART NUMBER	DESCRIPTION	RACK SPACES	DIMENSIONS (INCHES)	CONSTRUCTION	LOAD RATING

FIBER RAPID DEPLOYMENT (FRD) OUTDOOR CABINETS

FIBER RAPID DEPLOYMENT

The Fiber Rapid Deployment (FRD) System from LYNN combines everything you need for quick and seamless fiber optic installations. We combine plug-and-play connectivity with in-the-field cable management, climate control, security and power distribution, ensuring even the largest and most complex systems deploy rapidly and operate reliably for years to come.

BUILDING AN FRD SYSTEM

Step 1: Choose a Cabinet

Select a cabinet based on environment (NEMA rating), installation type (pad, pole, or wall mount) and required rack spaces.

Step 2: Customize the Cabinet

Customize the cabinet for your environment, including plinth height, air handling and access control.

Step 3: Populate the Cabinet

Populate the cabinet for quick field deployment with pre-terminated rack panels, splitters and other cabling and connectivity components.

FIBER RAPID DEPLOYMENT (FRD) OUTDOOR CABINETS

NEMA 3 OUTDOOR FDH CABINET

LYNN's NEMA 3 cabinet is ideal for weather-exposed outdoor and industrial indoor applications. Customizations include rack height, plinth height, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 3 rating for indoor and outdoor installations
- Rated for exposure to windblown dust, rain, sleet and snow
- Available in 8U, 16U or 24U configurations
- Available with 6" or 12" plinth
- Front and rear door access with 3-pt latch swing handle with hasp
- Depth adjustable 19" EIA mounting rails with installed fiber spools
- Fiber splitter mounting bracket allows mounting in 18 different locations
- Removable bottom gland plate for easy access to plinth
- Removeable plinth cover panels for easy access to cables and conduit
- Designed for pad mount

CUSTOMIZATIONS & KITTING

Rack Height

Available in 8U or 14U configurations. Both configurations feature depth adjustable 19" EIA mounting rails.

Plinth Height

Available with a matching 6" or 12" plinth base pedestal. Both configurations feature removable and lockable cover panels for access to cables and conduit.

Pre-Terminated FRD Panels

Available with pre-terminated rack panels and multistrand fiber. Panels ship pre-mounted with spooled fiber for rapid deployment.

Easier-to-Install Splitters

Side-mounted splitters facilitate higher-density installations and are easier to install.

Clear Dust Caps

Integrated clear dust caps on FRD panel connectors quickly show live connections for easy patching.

FIBER RAPID DEPLOYMENT (FRD) OUTDOOR CABINETS

NEMA 4 OUTDOOR CABINET

LYNN's NEMA 4 cabinet is ideal for weather-exposed outdoor and industrial indoor applications. Customizations include enhanced access control, enhanced airflow and temperature management, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 4 rating for indoor and outdoor installations
- Rated for exposure to windblown dust, hose directed water, rain, sleet and snow
- 26U height
- 12" plinth
- Front and rear door access with 3-pt latching and defeater handle
- Optional RFID reader available
- Removable side gland plates for optional airflow and temperature management
- Depth adjustable 19" EIA mounting rails with installed fiber spools
- Removable bottom gland plate for easy access to plinth
- Designed for pad mount

CUSTOMIZATIONS & KITTING

Access Control

Available with a locking defeater handle (standard) or optional IP65-rated RFID reader for enhanced user access and monitoring.

Pre-Terminated FRD Panels

Available with pre-terminated rack panels and multistrand fiber. Panels ship pre-mounted with spooled fiber for rapid deployment.

Airflow & Temperature Management

Available without airflow (standard), with a 142 CFM fan kit and exhaust filter, or with a 2000 – 3000 BTU air-conditioning unit.

High-Density Splitter Holder

Available with high-density splitter holders supporting models from LYNN and other manufacturers.

NEMA 3R WALL MOUNT OUTDOOR CABINET

LYNN's NEMA 3R wall-mount cabinet is ideal for weather-exposed outdoor and industrial indoor applications. The cabinet is designed for wall and pole mounting, and features a bottom panel with three 2.5" conduit holes (for 2" conduit) and a drain hole. Customizations include enhanced airflow, temperature management, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 3R rating for indoor and outdoor installations
- Rated for exposure to falling dust, rain, sleet and snow
- Internal 18" x 15" subpanel for mounting cable and connectivity
- Welded body with hinged front door
- Locking quarter-turn hex drive latches
- Three 2.5" vinyl conduit holes (supports 2" conduit) for bottom cable access
- Bottom drain hole with plug
- Removable side gland plates for optional airflow and temperature management
- Designed for wall mount or pole mount

CUSTOMIZATIONS & KITTING

Airflow & Temperature Management

Available without airflow (standard), with a fan kit and exhaust filter, or with a 60W plate-mounted heater unit.

Versatile Wood Mounting

An optional fiber distribution and management kit for wood-backed cabinets includes LGX holders, cable managers, ground lugs and mounting hardware.

High-Density Splice Tray Trees

LYNN offers high-density tree brackets supporting either six or twelve splice trays.

Multiple Splice Tray Configurations

LYNN offers splice trays in a variety of sizes and configurations.

NEMA 4 WALL MOUNT DOUBLE SWING OUTDOOR CABINET

LYNN's NEMA 4 wall mount double swing cabinet is ideal for weather-exposed outdoor and industrial indoor applications. The cabinet is designed for wall and pole mounting with flexible cable management options. Customizations include rack height, cabinet depth, enhanced access control, enhanced airflow, temperature management, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 4 rating for indoor and outdoor installations
- Rated for exposure to windblown dust, hose directed water, rain, sleet and snow
- Available in 11U, 18U or 25U configurations
- Available in 24" or 32" cabinet depths
- Two pairs of depth adjustable 19" EIA mounting rails
- Welded body with hinged front door
- Locking swing handle with hasp and 3-pt latch or optional locking quarter-turn hex drive latches
- External rear compression twist latches between center and rear section
- Removable side gland plates for optional airflow and temperature management
- Designed for double swing wall mount or pole mount
- Lift off rear hinges for easy installation

CUSTOMIZATIONS & KITTING

Rack Height

Available in 11U, 14U or 25U configurations. All configurations feature two pair of depth adjustable 19" EIA mounting rails.

Cabinet Depth

Available in 24" or 32" cabinet depth, providing versatility for cabling, connectivity, and cable management.

Access Control

Available with a locking swing handle (standard) or optional quarter-turn hex drive latches.

Airflow & Temperature Management

Available without airflow (standard), with a 142 CFM fan kit and exhaust filter, or with a 2000 – 3000 BTU air-conditioning unit and factory-installed 5" thick R3 insulation.

Pre-Terminated FRD Panels

Available with pre-terminated rack panels and multistrand fiber. Panels ship pre-mounted with spooled fiber for rapid deployment.

NEMA 3R & 4 SINGLE BAY OUTDOOR CABINET

LYNN's single bay cabinets are available in NEMA 3R and NEMA 4 ratings, making them ideal for outdoor and indoor applications. Customizations include rack height, cabinet depth, enhanced airflow and temperature management, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 3R rating for indoor and outdoor installations; ideal for exposure to falling dust, rain, sleet and snow
- NEMA 250 Type 4 rating for indoor and outdoor installations; ideal for exposure to windblown dust, hose directed water, rain, sleet and snow
- Available in 16U, 24U, 30U or 42U configurations
- Available with 8" or 16" plinth
- Available in 32", 36" or 42" depths for flexible cabling and cable management
- Two pairs of depth adjustable 19/23" EIA mounting rails
- Front and rear door access with 3-pt latch swing handle with hasp
- Wind stop and seamless weather gasket on all doors
- Factory-installed power and grounding
- Optional airflow and temperature management
- Designed for pad mount

CUSTOMIZATIONS & KITTING

NEMA Rating

Available in two NEMA ratings depending on environment. NEMA 3R provides protection from falling dust, rain, sleet, and snow. NEMA 4 enhances protection from blown dust and pressure hosed water.

Rack Height

Available in 24U or 28U configurations. Both configurations feature depth adjustable 19/23" EIA mounting rails with zero-U mounting patterns for accessories.

Cabinet Depth

Available in 32", 36" or 42" cabinet depth, providing versatility for cabling, connectivity, and cable management.

Plinth Height

Available with a matching 8" or 16" plinth base pedestal.

Airflow & Temperature Management

Available without airflow (standard), with air conditioning, or with a heat exchanger and factory-installed 5" thick R3 insulation. The temperature control on/off switch can be installed on the front or rear of the frame.

Pre-Terminated FRD Panels

Available with pre-terminated rack panels and multistrand fiber. Panels ship pre-mounted with spooled fiber for rapid deployment.

NEMA 3R & 4 DOUBLE BAY OUTDOOR CABINET

LYNN's double bay cabinets are available in NEMA 3R and NEMA 4 ratings, making them ideal for outdoor and indoor applications. Customizations include rack height, cabinet depth, enhanced airflow and temperature management, and factory-installed cabling and connectivity.

Key Features

- NEMA 250 Type 3R rating for indoor and outdoor installations; ideal for exposure to falling dust, rain, sleet and snow
- NEMA 250 Type 4 rating for indoor and outdoor installations; ideal for exposure to windblown dust, hose directed water, rain, sleet and snow
- Available in 24U or 28U configurations
- Available with 8" or 16" plinth
- Available in 32", 36" or 40" depths for flexible cabling and cable management
- Two pairs of depth adjustable 19/23" EIA mounting rails
- Front and rear door access with 3-pt latch swing handle with hasp
- Wind stop and seamless weather gasket on all doors
- Factory-installed power and grounding
- Optional airflow and temperature management

KITTING & PROJECT STAGING

NSI offers kitting and project staging, ensuring even the largest and most complex systems deploy rapidly and operate reliably for years to come. All LYNN cabinets can be factory-configured with LYNN and third-party components prior to shipping, providing a streamlined deployment process that reduces freight and field labor.

FIBER RAPID DEPLOYMENT (FRD) PANELS & SPLITTERS

FIBER RAPID DEPLOYMENT PANELS

Fiber Rapid Deployment (FRD) panels feature factory-installed fiber patching with pre-spliced multistrand cable.

Key Features

- Factory-terminated patch panels for quick field deployment
- Pre-spliced and spooled multistrand fiber pigtail with SC/APC connectors
- Available with standard bend-insensitive outdoor, ribbon and micro-armored single mode fiber
- 19" or 23" EIA mounting

RUGGEDIZED PLC FIBER SPLITTERS

Ruggedized PLC (planar lightwave circuit) fiber splitters are available in a number of configurations and are designed for extreme temperatures.

Key Features

- Ruggedized breakout cable constructed of bend-insensitive single mode fiber with varying breakout lengths
- SC/APC connectors standard
- Stock and custom configurations

HYPERDROP OUTDOOR ENCLOSURES & CABLE MANAGEMENT

HYPERDROP OUTDOOR ENCLOSURES & CABLE MANAGEMENT

HyperDrop enclosures and cable management solutions provide piece of mind when splicing and protecting fiber in outdoor and harsh environments. They're designed for quick, reliable and long-term deployment in aerial, pedestal and underground applications.

HYPERDROP CAN SERIES

Designed for outside plant networking and broadband connectivity, the CAN Series is a proven fiber management enclosure with a reliable, easy-to-use sealing system. CAN enclosures are ideal for aerial, pedestal and underground applications.

Key Features

- Single-ended design includes base, dome & sealing clamp
- Base features both round & oval cable entry/exit ports
- IP68 rated

PART NUMBER	DESCRIPTION	FIBER CONNECTIONS	CAPACITY / CONSTRUCTION	RATING
HDCAN-576	HYPERDROP CAN 576 FIBER ENCLOSURE	576	SUPPORTS (8) 72-FIBER SPLICE TRAYS (SOLD SEPARATELY)	IP68
HDCAN-288	HYPERDROP CAN 288 FIBER ENCLOSURE	288	SUPPORTS (12) 24-FIBER SPLICE TRAYS (SOLD SEPARATELY)	IP68
HDCAN-144	HYPERDROP CAN 144 FIBER ENCLOSURE	144	SUPPORTS (6) 24-FIBER SPLICE TRAYS (SOLD SEPARATELY)	IP68

HYPERDROP MST SERIES

Designed for outdoor enclosures, pedestals and equipment racks, the MST Series provides up to twelve fiber optic connections in a weather-rated, durable enclosure. MST enclosures include up to 1000 feet of pre-terminated single mode fiber.

Key Features

- Available with 2, 4, 6, 8 or 12 strand MST single mode fiber with pre-terminated connections
- Factory cut fiber in standard lengths of 50, 100, 150, 200, 250, 300, 400, 500, 750 & 1000 feet
- Available in toneable or non-toneable constructions
- IP67 rated

PART NUMBER	DESCRIPTION	FIBER CONNECTIONS	CAPACITY / CONSTRUCTION	RATING
HDMST-024FA-XXXX	HYPERDROP MST 2 FIBER DISTRIBUTION TERMINAL	2	ENCLOSURE W/ PRE-TERM FIBER	IP67

HYPERDROP OUTDOOR ENCLOSURES & CABLE MANAGEMENT

HYPERDROP SQUID SERIES

Designed for quickly splitting fiber signals without the need for splicing, the waterproof HyperDrop Squid is ideal for small vaults and pedestals. It features a single OptiTap input on 0.3m breakout to up to sixteen OptiTap outputs on 0.5m breakouts.

Key Features

- OptiTap compatible connectors on 0.3 & 0.5 meter breakouts
- Provides quick deployment in the field without splicing
- IP67 rated

HYPERDROP PAS SERIES

The HyperDrop compact patch and splice terminal is ideal for managing fiber in small vaults and on walls.

Key Features

- Easy pass-through cabling
- Easy, toolless opening & re-entry
- SC/APC connections
- IP67 rated

The HyperDrop patch and splice terminal is ideal for managing fiber in vaults, on walls and on poles.

Key Features

- Easy pass-through cabling
- Easy, toolless opening & re-entry
- SC/APC or OptiTap connections
- IP67 rated

HYPERDROP OUTDOOR ENCLOSURES & CABLE MANAGEMENT

HYPERDROP PAS MINI SERIES

Reliably splice, repair and extend cables with the LYNN HyperDrop PAS Mini outdoor-rated enclosure. It's compact and easy-to-install design protects connections even in the harshest environments.

The HyperDrop PAS Mini is compatible with fiber, twisted pair, coaxial and other low-voltage cables. It features a removable easy-to-splice internal fiber tray, and supports standard adapters, keystones and barrel-style couplers.

Key Features

- Rated for direct burial and aerial installation
- Includes hardware for pole, cable and surface mounting
- IP68 rated

PART NUMBER	DESCRIPTION	CONTENTS	RATING
HDPAS-M-FTTX	FTTX FIBER SPLICE KIT	ENCLOSURE W/ SC/APC COUPLER & MOUNTING HARDWARE	IP68
HDPAS-M-KIT	UNIVERSAL LOW-VOLTAGE SPLICE KIT	ENCLOSURE W/ SC/APC, LC/UPC, COAX & CAT6 COUPLERS & MOUNTING HARDWARE	IP68

HYPERDROP GEL SERIES

The LYNN HyperDropGEL™ patch and splice enclosure secures and manages fiber connections in a variety of underground and aboveground environments. The durable housing and unique gel-based sealing system ensures waterproof performance and a long service life for both round and flat drop cables.

The HyperDropGEL™ easily installs in pole mount, wall mount, aerial and direct burial applications

Key Features

- Supports pole mount, wall mount, aerial and direct burial installations
- Unique waterproof gel-based sealing system
- Easy-to-open design with water-tight latching
- IP68 rated

PROTECT FIBER INSTALLATIONS WITH FELT SPLICING TAPE

LYNN buffer tube felt tape protects fiber splices from slipping and abrasion, ensuring solid installations for years to come. LYNN tape is ultra-thin, ultra-pliable and features adhesive backing for fast and easy installation.

Plus, LYNN tape is available in twelve different colors allowing you to easily identify and segregate cable paths. It's an ideal buffer under zip ties and enclosure entry points.

PLATINUM TOOLS: CUT. STRIP. TERMINATE. TEST.

CUT. STRIP. TERMINATE. TEST.

Platinum Tools specializes in professional-grade tools, testers and installation accessories used for the preparation, termination and integration of low-voltage cabling.

WHY PARTNER WITH PLATINUM TOOLS?

Time-Saving

Patented products reduce installation labor by up to 50%

Dedicated to Innovation

Setting new standards with unique, problem-solving patented products

Serviceable Tools

Field-ready products designed to repair, not replace

In-Stock Locally

In-stock at 1200+ local and national distribution points

Installer Focused

Real-world solutions developed by real-world installers

WHAT'S NEW

ECO-TERMK-01 Fiber Termination Kit

- Fiber optic termination kit for mechanical connectors
- Compatible with single mode and multimode cable and connectors
- Includes: precision wheel cleaver, Kevlar scissors, tri-hole stripper, visual fault locator, alcohol bottle, pocket ruler, marker, cleaning wipes and carrying bag

PT-OTDR-100 Cable Tester

- Multi-function tester for fiber optic and twisted pair cables
- Rugged plastic and rubber enclosure with easy-to-use oversized touch screen
- Built-in fiber optic OTDR testing, twisted pair testing, continuity testing, loss testing, wiremap testing and IP testing
- Built-in flashlight and visual fault locator
- Save and export reports
- Includes copper test remote

RJ45 CONNECTORS

RJ45 CONNECTORS

The patented EZ-RJ45® and ezEX-RJ45® is the connector of choice for the largest integrators, assembly manufacturers and Tier-1 service providers across North America thanks to their fast and easy installation.

EZ-RJ45 Connectors (P/N MULTIPLE)

- Designed for 1G and non-PoE applications
- Original single piece pass-through RJ45s
- CAT5E and CAT6
- Shielded and unshielded

ezEX-RJ45 Connectors (P/N MULTIPLE)

- Designed for 1G, 10G and PoE+ up to 30W applications
- Patented staggered conductor path and built-in load bar for clean cuts and crimps
- Single piece pass-through RJ45s
- CAT5E, CAT6 and CAT6A
- Shielded and unshielded

PoE++ Type 4 Field Connector (P/N 106260)

- Designed for 1G, 10G and PoE++ up to 90W applications
- Easy-to-terminate two-piece design
- Single connector for CAT5E, CAT6 and CAT6A
- Supports 90W PoE++

TRUSTED QUALITY & PERFORMANCE.

Platinum Tools is a member of the SDVoE Alliance and HDBaseT Alliance, ensuring our 10G tools, testers and RJ45 connectors perform in the most demanding video over twisted pair applications.

PoE+ Shielded Field Connector (P/N 106250)

- Designed for 1G, 10G and PoE+
- Easy-to-terminate three-piece design
- Single connector for CAT6, CAT6A and CAT7
- Shielded
- Rated for HDBaseT, SDVoE and AV over twisted pair applications

Traditional RJ45 Crimp Connectors (P/N MULTIPLE)

- Designed for 1G, 10G and PoE+ applications
- Terminates with traditional crimp tool using standard installation practices
- CAT5E, CAT6 and CAT6A
- Accommodates larger gauge twisted pair
- Shielded and unshielded

CRIMPERS

A wide selection of crimpers and tool kits for RJ45, RJ11/12 and coaxial connectors.

PTS Pro Universal Crimp Tool (P/N 12520C)

- Compatible with EZ-RJ45, ezEX-RJ45 and standard connectors
- Compact ergonomic design
- Built-in cutting and stripping
- Audible click verifies connectors are in proper position when crimping

EXO Crimp Frame with Swappable Die (P/N 100061C)

- Compatible with EZ-RJ45 and ezEX-RJ45 connectors
- Features swappable die system depending on connector type
- Audible click verifies connectors are in proper position when crimping

TOOL AND TEST KITS

Combo kits provide the essential tools and testers required for installing and verifying low-voltage cable. The complete offering is online at PlatinumTools.com.

ezEX Mini Termination and Test Kit (P/N 90147)

Contents:

- EXO crimp frame and swappable die
- MapMaster mini cable tester with testing remotes
- Electrician scissors
- Cable jacket stripper
- 60 ezEX-RJ45 connectors
- Heavy-duty hanging tool pouch

Fiber Optic Termination Kit (P/N ECO-TERMK-01)

Contents:

- Precision wheel fiber cleaver
- Aramid strand / Kevlar scissors
- Tri-hole fiber strippers
- Visual fault locator with barrel-style adapter
- Alcohol dispensing bottle
- Pocket ruler
- Marker
- Cleaning wipes
- Big mouth carrying bag

IS YOUR RJ45 RATED FOR 10G AND POE?

Regular pass-through RJ45 connectors experience voltage shorting and crosstalk when faced with PoE, 10G and video over twisted pair. Platinum Tools' revolutionary ezEX-RJ45® system is the only UL-listed pass-through connector for PoE and PoE+ applications with a patented hi-lo stagger design and integrated load bar, delivering quick and reliable termination and future-ready performance.

CUTTERS

A wide selection of cutters that easily handle low-voltage cables, including inner steel strength members, Kevlar® and aramid yarn.

Telecom Diagonal Cutting Pliers (P/N 12103C)

- Durable chrome vanadium steel with comfort grip handles
- 0.030" and 0.045" wire stripping holes
- V-notch grooves for quick insulation slitting

CCS-6 Cable Cutter (P/N 10514C)

- Hardened SCM 440 steel
- Designed to cut copper and aluminum cable with a steel center conductor
- Optimal blade geometry ensures cables stay round during the cutting process

Kevlar Fiber Optic Scissors (P/N 10529C)

- Full serrated bottom blade for non-slip cutting
- Ergonomic oversized handles
- Easily resharpens and holds cutting edge

FIELD INSTALLATION

Durable and affordable equipment for field installation, including bags perfect for carrying tools, testers and other hardware to the jobsite.

Big Mouth Tool Bag (P/N 4006)

- Six spacious interior and exterior pockets
- 12.75" x 8.75" x 8.00"
- Water-resistant canvas with nylon stitching
- Collapses flat when not in use

Heavy-Duty Hanging Tool Pouch (P/N 4007)

- Three internal zippered compartments
- 12.00" x 17.00" when open
- Wrap around strap with snap buckle
- D-ring for hanging rolled pouch

Can Wrench (P/N 19059C)

- Ideal for accessing service boxes and pedestals or tightening nuts on binding post terminals
- 7/16" and 3/8" hex head sockets

STRIPPERS

STRIPPERS

A wide selection of cable jacket strippers for the preparation of fiber, twisted pair, coax and other low-voltage cables.

Cable Jacket Stripper (P/N 15015C)

- Quickly removes cable jackets without nicking inner conductors
- Cable diameter range from 4.5 – 6.3mm
- No adjustment required when switching between cables

Slit and Ring Fiber Cable Stripper (P/N 15062C)

- Ideal for cable jackets and buffer tubes
- Cable diameter range from 1.2 – 6.4mm
- Removable and reversible slitting V-block
- Adjustable slit blade and ring blade for exact strip cut depth

BR1 Cable Multi-Stripper (P/N 15041C)

- Ideal for stripping and cutting
- Cutters for both cable and wire conductors
- Built-in braid comb

5-in-1 Fiber Optic Stripper (P/N 15061C)

- Five cavity design: 2.8 – 3.0mm outside jacket, 2.0 – 3.0mm loose tube, 2.0 – 2.4mm outside jacket, 900µm buffer and 250 µm coating
- Cushioned grip handles

TOR Cable Stripper and Slitter (P/N 10017C)

- Ideal for stripping and slitting thick and heavy-duty cables
- Rotating adjustable blade height
- Positive locking positions for circular, spiral (apple peel) and lengthways strips
- Two cable clamp sizes

Cyclops® 2 Cable Jacket Stripper (P/N 15010C)

- Quickly removes cable jackets without nicking inner conductors
- Cable diameter range from 2.5 – 11mm
- Self-adjusting

WE KEEP GOOD COMPANY.

The Platinum Tools patented EZ-RJ45® and ezEX-RJ45® is the connector of choice for the largest Tier-1 service providers across North America.

TESTERS

Affordable, easy-to-use testers for verifying proper cable termination, installation and performance.

Fiber Optic Visual Fault Locator

(P/N TVFL100)

- Bright 10mW laser for continuity testing
- Lightweight aluminum construction
- Solid or flashing beam
- Supports 1.25mm and 2.5mm ferrules

LANSeeker™ Tester

(P/N TP500C)

- Twisted pair cable tester
- Test shorts, opens, miswires, reverse and split pairs
- Built-in tone generator

PoE++ Tester

(P/N TPS200C)

- Test PoE inline on active devices
- Test DC power supplies
- Test active cables without disrupting data flow
- No power supply required

MapMaster™ Mini Tester

(P/N T109C)

- Twisted pair cable tester
- Test shorts, opens, miswires, reverse and split pairs
- Built-in tone generator
- Map multiple locations

Digital Tone and Probe Kit

(P/N TDG310K1C)

- Trace and locate cables in unpowered or live circuits
- Test RJ45 terminations
- Built-in signal strength indicators

VDV MapMaster 3.0™ Tester

(P/N T130)

- Twisted pair and coax cable tester
- Test shorts, opens, miswires, reverse and split pairs
- Measure cable and fault length
- Map multiple locations

Analog Tone and Probe Kit

(P/N TG220K1C)

- Trace and locate analog cables
- Four tone amplitude levels
- Three distinct tone settings

NetXpert XG2 10G Network Tester

(P/N TXG200)

- Certify ethernet speeds up to 10G
- Complete active wired & WiFi testing
- PoE testing up to 90W (PoE++)
- Cable qualification to IEEE standards

NEW PRODUCT: PT-OTDR-100 CABLE TESTER

The PT-OTDR-100 eliminates the need to carry multiple testers by combining robust fiber and twisted pair testing into a single unit.

Features:

- Multi-function fiber optic and twisted pair cable and network testing
- Rugged plastic and rubber enclosure with easy-to-use oversized touch screen
- Built-in fiber optic OTDR testing, twisted pair TDR testing, continuity testing, loss testing, wiremap testing and IP testing
- Built-in flashlight and visual fault locator
- Save and export reports
- Includes copper test remote

WEATHER-RATED

Weather-rated solutions protect splices and connections in outdoor installations and harsh environments.

Weatherproof Coupler Housing (P/N 744)

- IP64 rated
- Compatible with twisted pair, fiber and coax
- Full rubber liner with dual locking latches
- Supports keystone and barrel couplers

Waterproof Splice Coupler (P/N 740C)

- IP67 rated
- Screw mating system
- Shock and vibration resistant
- Compatible with unshielded and shielded CAT5E and CAT6

Weatherproof Keystone Jack (P/N 745-1)

- IP64 rated
- Installs in any 1" knockout or threaded hole
- Terminate with any 110 blade and punchdown tool
- Compatible with unshielded and shielded CAT5E and CAT6

HIGH PERFORMANCE J-HOOKS

HIGH PERFORMANCE J-HOOKS

Standard J-Hooks simply aren't designed to support high-bandwidth twisted pair and fiber optic cables. The Platinum Tools HPH Series eliminates cable sag with an extra-wide design.

Features:

- Wide design reduces cable sag, signal degradation and signal loss
- Built-in retainer strap eliminates cable and Velcro® ties
- Available in multiple sizes and four colors for cable segregation
- Smooth plastic for easy cable slide
- 50lb static load rating
- Plenum rated
- cULus listed
- RoHS and TIA compliant
- Patented

CABLE MANAGEMENT

Platinum Tools offers a variety of traditional cable management solutions and installation accessories, including standard J-Hooks, bridle rings, mounting tools and installation accessories.

Traditional J-Hooks (P/N MULTIPLE)

- Pre-assembled with mounting bracket and hook-only options
- Multiple sizes and configurations
- All steel construction
- Up to 50lb load capacity

Bridle Rings (P/N MULTIPLE)

- Available in bolt and wood screw constructions
- Multiple sizes and configurations
- Low carbon steel construction
- Up to 45lb load capacity

Installation Xtender Pole™ (P/N JH718)

- Telescoping extension pole for safely installing J-Hooks and bridle rings in high and hard-to-reach locations
- 12ft and 18ft pole lengths
- Multiple interchangeable heads accommodate a wide variety of mounting hardware
- Compatible with and powered by 3/8in drills

SIMPLIFY FIBER OPTICS

TechLogix delivers innovative, value-rich solutions while simplifying the design and integration of fiber optics in AV, security, broadband and datacom applications.

WHY PARTNER WITH TECHLOGIX NETWORKX?

Reliability

99.7% reliability guaranteed for dependable performance

Simplify Integration

Plug-and-play solutions for quick, hassle-free installations

Thought Leadership

Industry-acclaimed resources for innovation and training

Fiber Simplified

Committed to streamlining fiber optic technology and integrations

Dedicated to Innovation

Award-winning technology for today and tomorrow's installations

WHAT'S NEW

MOFO™ Wallplate & Table Plate Cables

- Fiber-based HDMI and USB cables that snap into wallplates and table plates
- Lengths up to 165ft
- No power required
- Plenum-rated

MOFO™ USB-C Fiber-Based Cables

- Fiber-based USB-C cables
- SuperSpeed USB 3.1 (Gen 2)
- Lengths up to 33ft
- No power required
- Plenum-rated

MOFO™ Detachable 8K HDMI Cable

- Fiber-based HDMI cables with detachable connectors for easy installation
- 48G 8K60 HDMI compliant
- Lengths up to 330ft
- No power required
- Plenum-rated

PoE Extenders & Injectors

- 1G Ethernet PoE extenders for indoor and outdoor installation
- 1G Ethernet PoE injectors with 60W power

Media Converter Rack Mounting

- Rack mount 2U chassis for up to 14 media converters
- Secures, manages and powers devices
- Built-in cooling fans

Network Switches

- 1G twisted pair and fiber optic network switches
- Unmanaged with PoE+ power per port
- Desktop and rack mount installation

MOFO™ FIBER-BASED HDMI, USB & DISPLAYPORT CABLES

MOFO™ cables leverage a true fiber core to deliver unparalleled speed, bandwidth, and reliability. Pre-terminated HDMI, USB, and DisplayPort connectors accommodate installations in seconds and the optical construction provides complete immunity to RF, EM, and electrical interference without the need for inline boosters, extenders, or power supplies. Additionally, MOFO™ cables can be repurposed in the field using standard fiber optic tools and connectors.

MOFO™ cables are available in traditional cable constructions, wallplate and table insert constructions, and heavy-duty micro-armored constructions.

Forget clunky extenders and bandwidth-limited copper cable. MOFO™ cables deliver cleaner installations, fewer failure points, superior signal quality, and future-ready cable runs.

TechLogix MOFO™ PT Series
Patent Pending. No. 63/239,548

KEY FEATURES

- Available in HDMI, USB & DisplayPort
- Full, uncompressed 4K, 8K & SuperSpeed support
- Extension up to 330ft (100m) without power supplies, extenders or boosters
- Available with indoor plenum & outdoor TPU jacket ratings
- Available with detachable heads for easier pulling through conduit & tight spaces
- Built with four strands of bend-insensitive multimode OM3 fiber
- Repurpose using standard fiber optic tools & connectors
- Interference-free signal transmission
- 45mm / 1.8in bend-radius
- 70lb pull-rating

MOFO™ FIBER-BASED HDMI, USB & DISPLAYPORT CABLES

4K HDMI CABLES

HD20 cables feature the native, uncompressed transmission of 1080p and 4K HDMI up to 165ft (50m) without the need for external power supplies, boosters, or extenders.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	MAX RESOLUTION	JACKET

FEATURES

- 5.8mm diameter tactical jacket with internal stainless steel micro-armor
- 30mm x 19mm metal HDMI headshell supports pulling through 1" conduit
- Includes factory-installed weatherproof headshell caps
- Available as standard cables or on factory-installed tactical reels
- No power required
- Completely immune to electrical and RF interference
- 25mm bend-rating
- 100lb pull-rating
- 1100lb crush-rating

MOFO™ HD20ST cable on a factory-installed tactical reel

MOFO™ cables rely on power from the HDMI, DisplayPort, and USB ports of connected electronics. Standard inline adapters and couplers can weaken the power flow and are not recommended. Applications requiring a wallplate, table insert, or inline coupling should use the MOFO™ PT Series (following page).

MOFO™ FIBER-BASED HDMI, USB & DISPLAYPORT CABLES

WALLPLATE & TABLE PLATE HDMI & USB CABLES

The MOFO™ PT Series combines fiber-based cabling with traditional table inserts and wallplates, delivering cleaner installations with fewer failure points than traditional extender-based and pass-through systems.

PLATE ACCESSORIES (Designed for direct integration with MOFO™ PT cables)

PART NUMBER	FORMAT	COLOR	CONNECTOR PORTS	MATERIAL
MOFO-PT-TA1W	TABLE INSERT	WHITE	1	ALUMINUM
MOFO-PT-TA1B	TABLE INSERT	BLACK	1	ALUMINUM
MOFO-PT-WD1W	WALLPLATE (DECORA)	WHITE	1	ALUMINUM
MOFO-PT-WD2W	WALLPLATE (DECORA)	WHITE	2	ALUMINUM
MOFO-PT-WD1B	WALLPLATE (DECORA)	BLACK	1	ALUMINUM
MOFO-PT-WD2B	WALLPLATE (DECORA)	BLACK	2	ALUMINUM

FEATURES

- No power required
- Options for HDMI & USB
- Repurpose in the field using standard fiber tools & connectors
- Female source connector mounts to table insert or wallplate
- Male destination connector mounts directly to displays & projectors
- Plenum-rated cable jacket
- Metal molded connector headshells for durability
- Furniture-grade aluminum plates
- Includes 6ft patch HDMI or USB patch cord
- Recommended for 2" deep wallboxes & 1" conduit (or greater)
- Patent pending (No. 63/239,548)

MOFO™ PT Series cables flush-mount directly on stock or custom wallplates & table inserts

The MOFO™ PT Series supports inline HDMI coupling and includes a 6ft HDMI patch cord. Longer patch cords may be used; however, TechLogix recommends only using certified HDMI cables with a maximum length of 16ft.

MOFO™ FIBER-BASED HDMI, USB & DISPLAYPORT CABLES

USB-A CABLES

USB3 cables extend SuperSpeed USB data and power (2.5W/5V/0.9A) up to 100ft (30m) without the need for external power supplies, boosters or extenders.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	JACKET
MOFO-USB3-10	10M / 33 FT	MALE USB-A	FEMALE USB-A	5G / SUPERSPEED (3.0)	4.3MM PLENUM
MOFO-USB3-15	15M / 50 FT	MALE USB-A	FEMALE USB-A	5G / SUPERSPEED (3.0)	4.3MM PLENUM
MOFO-USB3-23	23M / 75 FT	MALE USB-A	FEMALE USB-A	5G / SUPERSPEED (3.0)	4.3MM PLENUM
MOFO-USB3-30	30M / 100 FT	MALE USB-A	FEMALE USB-A	5G / SUPERSPEED (3.0)	4.3MM PLENUM

UNIVERSAL USB-A CABLES

USB321 cables extend SuperSpeed, Hi-Speed, and Full-Speed USB data and power (2.5W/5V/0.9A) up to 50ft (15m) without the need for external power supplies, boosters or extenders.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	JACKET
MOFO-USB321-03	3M / 10 FT	MALE USB-A	FEMALE USB-A	10G / SUPERSPEED (3.0), HI-SPEED (2.0), FULL-SPEED (1.1)	4.3MM PLENUM
MOFO-USB321-05	5M / 16 FT	MALE USB-A	FEMALE USB-A	10G / SUPERSPEED (3.0), HI-SPEED (2.0), FULL-SPEED (1.1)	4.3MM PLENUM
MOFO-USB321-08	8M / 26 FT	MALE USB-A	FEMALE USB-A	10G / SUPERSPEED (3.0), HI-SPEED (2.0), FULL-SPEED (1.1)	4.3MM PLENUM
MOFO-USB321-10	10M / 33 FT	MALE USB-A	FEMALE USB-A	10G / SUPERSPEED (3.0), HI-SPEED (2.0), FULL-SPEED (1.1)	4.3MM PLENUM
MOFO-USB321-15	15M / 50 FT	MALE USB-A	FEMALE USB-A	10G / SUPERSPEED (3.0), HI-SPEED (2.0), FULL-SPEED (1.1)	4.3MM PLENUM

USB-C CABLES

USB-C cables extend SuperSpeed and Hi-Speed USB data and power (60W/20V/3A) up to 33ft (10m) without the need for external power supplies, boosters or extenders.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	JACKET
MOFO-USBC-03	3M / 10 FT	MALE USB-C	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBC-05	5M / 16 FT	MALE USB-C	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBC-08	8M / 26 FT	MALE USB-C	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBC-10	10M / 33 FT	MALE USB-C	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM

MOFO™ USB cables support the transmission of power from source electronics to destination electronics – this is particularly useful when integrating web cameras and conferencing equipment. However, some electronics require power beyond the typical USB specification (2.5W/5V/0.9A) and TechLogix recommends powering these devices locally or inserting a powered USB hub on the destination side of the MOFO™ cable run.

USB-A TO USB-C CABLES

USB-A to USB-C cables adapt USB Type-A connections to USB Type-C connections and extend SuperSpeed and Hi-Speed USB data and power (2.5W/5V/0.9A) up to 165ft (50m) without the need for external power supplies, boosters or extenders.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	JACKET
MOFO-USBAC-03	3M / 10 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-05	5M / 16 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-08	8M / 26 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-10	10M / 33 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-15	15M / 50 FT.	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-30	30M / 100 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM
MOFO-USBAC-50	50M / 165 FT	MALE USB-A	MALE USB-C	10G / SUPERSPEED (3.1 GEN 2), HI-SPEED (2.0)	4.8MM PLENUM

DISPLAYPORT CABLES

DP20 cables feature the native, uncompressed transmission of DisplayPort signals up to 330ft (100m) without the need for external power supplies, boosters or extenders. DP20 cables support VESA resolutions up to 40G 8K.

PART NUMBER	LENGTH	CONNECTOR A	CONNECTOR B	BANDWIDTH / FORMAT	MAX RESOLUTION	JACKET
MOFO-DP20-03	3M / 10 FT	MALE DISPLAYPORT	MALE DISPLAYPORT	40G / DISPLAYPORT 2.0	8K	4.5MM PLENUM

MOFO-DP20-100	100M / 330 FT	MALE DISPLAYPORT	MALE DISPLAYPORT	40G / DISPLAYPORT 2.0	8K	4.5MM PLENUM

All TechLogix MOFO™ cables feature four strands of bend-insensitive multimode OM3 fiber that can be repurposed using standard fiber optic tools and connectors. Cables used for HDMI, DisplayPort, and USB today can be quickly converted for network and AV over IP signals tomorrow.

Learn to terminate fiber at www.tlnetworkx.com.

POE EXTENDERS & INJECTORS

TechLogix power-over-ethernet solutions extend PoE beyond the typical 330ft (100m) limit and inject PoE onto cable runs where non-PoE electronics are installed.

PART NUMBER	DESCRIPTION	BANDWIDTH	ENVIRONMENT	POE
TL-PI-60W	ETHERNET POE INJECTOR	1G	INDOOR	60W
TL-PE-30W	ETHERNET POE EXTENDER FOR INDOOR USE	1G	INDOOR	30W
TL-PE-30W-IO	ETHERNET POE EXTENDER FOR INDOOR/OUTDOOR USE	1G	INDOOR/OUTDOOR	30W

TL-PI-60W
Injects 60W PoE onto cable runs.

TL-PE-30W
Extends 30W PoE beyond the 330ft maximum distance. Up to 5 units may be cascaded.

TL-PE-30W-IO
Extends 30W PoE beyond the 330ft maximum distance. Up to 5 units may be cascaded. Supports outdoor installation and harsh environments.

MEDIA CONVERTERS

TechLogix manufactures a variety of media converters for adapting fiber optic and twisted pair signals. Models include solutions for 1G and 10G bandwidth, PoE+ injection, and LC and SC connections.

PART NUMBER	LYNN CROSS REFERENCE	BANDWIDTH	TWISTED PAIR PORTS	FIBER PORTS	POE
TL-MC-1S1R	MC-1500	1G	1	1 (EMPTY SFP SLOT)	NA
TL-MC-1S1R-MM	MC-1500LC-MM550	1G	1	1 (INCLUDES MM SFP)	
TL-MC-1S1R-SM	MC-1500LC-SM10K	1G	1	1 (INCLUDES SM SFP)	
TL-MC-1S1RPP	NA	1G	1	1 (EMPTY SFP SLOT)	30W PoE+ 30W PoE+ 30W PoE+
TL-MC-1S1RPP-MM		1G	1	1 (INCLUDES MM SFP)	
TL-MC-1S1RPP-SM		1G	1	1 (INCLUDES SM SFP)	
TL-MC-1S1S	MC-3000	1G	NA	2 (EMPTY SFP SLOTS)	NA
TL-MC-1S1S-MMSM	MC-3000LC-MM/SM	1G		2 (INCLUDES MM & SM SFPs)	
TL-MC-1S2R	NA	1G	2	1 (EMPTY SFP SLOT)	NA
TL-MC-1S2R-MM		1G	2	1 (INCLUDES MM SFP)	
TL-MC-1S2R-SM		1G	2	1 (INCLUDES SM SFP)	
TL-MC10G-1S1R	NA	10G	1	1 (EMPTY SFP+ SLOT)	NA
TL-MC10G-1S1R-MM		10G	1	1 (INCLUDES MM SFP+)	
TL-MC10G-1S1R-SM		10G	1	1 (INCLUDES SM SFP+)	
TL-MC-2SC1R-MM	MC-1000SC-MM	1G	1	1 (MM DUPLEX SC)	NA
TL-MC-2SC1R-SM	MC-1000SC-SM	1G	1	1 (SM DUPLEX SC)	

TL-MC-1S1R
Basic 1G media converter for adapting fiber to twisted pair. Also available in 10G (TL-MC10G-1S1R) and with PoE+ injection (TL-MC-1S1RPP).

TL-MC-1S2R
1G media converter with a single fiber port and dual twisted pair ports. Ideal for supporting two twisted pair devices simultaneously.

TL-MC-1S1S
1G media converter with dual fiber ports. Ideal for converting multimode to single mode or duplex to simplex when using compatible SFP modules.

MEDIA CONVERTER RACK MOUNTING

The TechLogix TL-RKMC-14 rack-mount chassis secures and powers up to 14 media converters. The system features two switching redundant power supplies with circuit protection, two high-volume cooling fans, and slot isolation between units.

PART NUMBER	LYNN CROSS REFERENCE	MEDIA CONVERTER SLOTS	RACK UNIT HEIGHT	RACK WIDTH	POWER
TL-RKMC-14	NA	14	2RU	19 INCH	INPUT: 100 – 260VAC OUTPUT: 5VDC 12A DUAL INTEGRATED POWER SUPPLIES W/ COOLING FANS

TL-RKMC-14 front panel (media converters sold separately)

TL-RKMC-14 rear panel

NETWORK SWITCHES

TechLogix network switches manage signal distribution over both twisted pair and fiber infrastructures.

PART NUMBER	FORMAT	BANDWIDTH	TWISTED PAIR PORTS	FIBER SFP PORTS	POE
TL-NS5R-POE	DESKTOP UNMANAGED POE+ SWITCH	1G	5	0	30W PER PORT 60W TOTAL
TL-NS5R1S-POE	DESKTOP UNMANAGED POE+ SWITCH	1G	5	1	30W PER PORT 91W TOTAL
TL-NS42-POE	DESKTOP UNMANAGED POE+ SWITCH	1G	5	2	30W PER PORT 120W TOTAL
TL-NS8R	DESKTOP UNMANAGED SWITCH	1G	8	0	NA
TL-NS8R2U-POE	DESKTOP UNMANAGED POE+ SWITCH	1G	10	0	30W PER PORT 120W TOTAL
TL-NS24R2S-POE	RACK MOUNT UNMANAGED POE+ SWITCH	1G	24	2	30W PER PORT 300W TOTAL

TL-NS5R-POE
Five port unmanaged switch with 30W PoE per channel.

TL-NS5R1S-POE
Four port unmanaged switch with 30W PoE per channel. Includes one twisted pair and one SFP uplink port.

TL-NS42-POE
Four port unmanaged switch with 30W PoE per channel. Includes one twisted pair and two SFP uplink ports for daisy-chaining over fiber.

TL-NS8R
Non-PoE eight port unmanaged switch.

TL-NS8R2U-POE
Eight port unmanaged switch with 30W PoE per channel. Includes two twisted pair uplink ports.

TL-NS24R2S-POE
24-port unmanaged switch with 30W PoE per channel. Includes two SFP uplink ports and rack-mounting hardware.

ECO SERIES™ FIBER OPTIC CONNECTORS

TechLogix ECO Series™ field-installable connectors provide the quick, easy and reliable termination of fiber optic cable – no epoxy, crimping, polishing or proprietary tools required.

Unlike other connectors which are marketed as “one size fits all” and experience signal variability on different cable formats, ECO Series™ connectors are cable construction specific to ensure perfect ferrule alignment and best-in-class long-term reliability. Additionally, ECO connectors allow re-termination up to five times and are tamper-resistant when used with an included connector reset jig.

Rethink outdoor fiber. TechLogix OSPFiber™ delivers a single fiber optic cable for outdoor direct burial, drop and aerial applications.

- Single Mode OS2 fiber
- Integrated quick strip technology for fast in-field termination
- Ruggedized water & UV-rated jacket
- Steel messenger wire for underground toning & aerial suspension
- 2, 6 & 12 strand constructions
- 30mm bend-rating
- Up to 50% less expensive than traditional armored & OSP cables

AFFORDABLE ELECTRICAL & SPLICING TAPE

Whether you are bundling, insulating, splicing or simply need protection against corrosion, UV or moisture, WarriorWrap® outperforms the competition even in the harshest environments.

ELECTRICAL & SPLICING TAPE

Heavy-Duty Performance

832 Series (P/N: WW-832)

- 8.5 mil thickness
- Resistant to UV, abrasion and corrosion
- 0 – 221 degrees F operating temperature
- Superior adhesion
- Available in 11 different colors
- Available in 1.5” extra-wide construction

General Use Performance

716 Series (P/N: WW-716)

- 7 mil thickness
- Resistant to UV, abrasion and corrosion
- 20 – 176 degrees F operating temperature
- Standard adhesion
- Available in 11 different colors

Heavy-Duty Data Communication

832-DC Series (P/N: WW-832-DC)

- 8.5 mil thickness with superior adhesion
- Optimized for residential and commercial data communications installations
- Resistant to UV, abrasion and corrosion
- 0 – 221 degrees F operating temperature
- Available in black

Rubber-Based Semi-Conducting

P/N: WW-SC-75

- Expands and contracts due to load cycling
- Non-adhesive and self-bonding when wrapped under tension
- Forms a solid mass after installation
- Waterproof and electrically insulated
- Available in gray

Professional+ Performance

732 Series (P/N: WW-732)

- 7 mil thickness
- Resistant to UV, abrasion and corrosion
- 0 – 221 degrees F operating temperature
- Superior adhesion
- Available in 11 different colors

Black Harness Wrap

P/N: WW-HW-75

- 5 mil thickness
- Optimized for the harnessing and bundling of cables
- 41 – 95 degrees F operating temperature
- Available in black

Professional Performance

722 Series (P/N: WW-722)

- 7 mil thickness
- Resistant to UV, abrasion and corrosion
- 20 – 176 degrees F operating temperature
- Superior adhesion
- Available in 11 different colors

Tinned Copper-Knit Shielding

P/N: WW-SH-10

- All-copper tape made of knit-mesh weave
- Provides metallic shielding
- Easily conforms to irregular shapes for easy installation
- Knit design is quick to install, remove and reshape

SPECIALTY TAPE

General Use Duct

P/N: EWDT-8

- 2" wide cloth reinforced duct tape
- Water-resistant
- Easy tear construction
- Commercial-grade adhesion, elasticity and breaking strength
- Available in 3 different colors

Clean-Removal Painter's

P/N: EWPT

- 1.5" wide paper painter's tape
- Acrylic adhesive removes without leaving a trace on most surfaces even after 14 days
- Commercial-grade durability while still tearing easily by hand
- Available in blue

Heavy-Duty Duct

P/N: EWDT-9HD

- 2" wide cloth reinforced duct tape
- Superior water-resistance
- Easy tear construction
- Commercial-grade adhesion, elasticity and breaking strength
- Available in gray

Acrylic Packing

P/N: EWPK-2A

- 2" wide clear acrylic packing tape
- Commercial-grade construction with incredible holding power, high break strength and long shelf life
- Pressure-sensitive adhesion with or without an applicator tool

Easy-Wrap Gaffer's

P/N: EWGF

- 2" wide gaffer's tape
- Synthetic rubber adhesive removes without leaving a trace on most surfaces
- Commercial-grade durability while still tearing easily by hand
- Matte-black finish reduces glare

Corrosion Protection

P/N: WW-CP-201

- 2" and 4" wide corrosion protection tape
- Protects against abrasion, corrosion, chemicals, impact and extreme weather
- Rated for indoor, outdoor and underground installation
- Available in black with or without printing

THE TACTICAL WARRIOR FOR SPECIAL USE

WarriorWrap® is available in a variety of lengths, constructions and colors, ensuring you have an affordable, field-ready solution for your next installation. Options include:

- Arc proof tape
- Cambric tape
- Corrosion protection tape
- Duct tape
- Electrical Tape
- Gaffer's tape
- Glass cloth tape
- Mastic tape
- Packing tape
- Painter's tape
- Rubber splicing tape
- Semi-conducting tape
- Shielding tape
- Silicone rubber tape
